

✓ **Has your child had symptoms of diarrhoea and/or vomiting?**

✓ **Is it less than 48 hours since these symptoms stopped?**

If Yes ... Please do not bring your child to nursery.

There is an increased frequency of these symptoms within the community at present and all parents/guardians are asked not to bring their child into the nursery unless the child has been free of symptoms for more than 48 hours and has had a formed stool in an attempt to prevent the spread to other nursery users. More information is available from nursery staff on request.
